

Seefile is the perfect solution to **publish, organize** and **review** photos and other media files online.

Be free :

Your **files remain on your computer**. There is no need for a host.

Appealing :

Thumbnails and previews are automatically created by SeeFile. With one click, you can see a **preview** and **metadata**.

Easy :

Universal access from a standard web browser Mac/Windows/Linux.

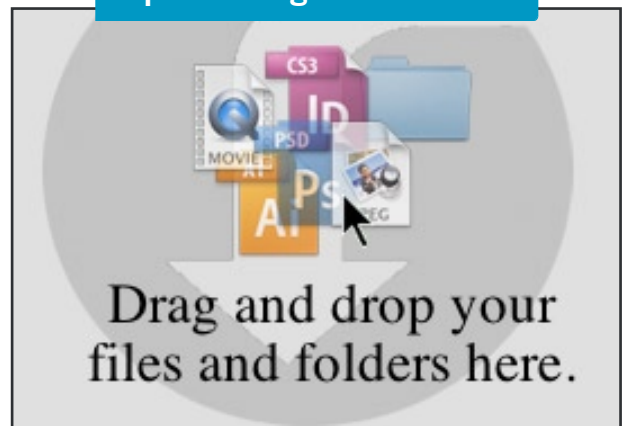

Online annotations :

From a low-res preview, a user can select an area and **add comments** that can be forwarded to your email.

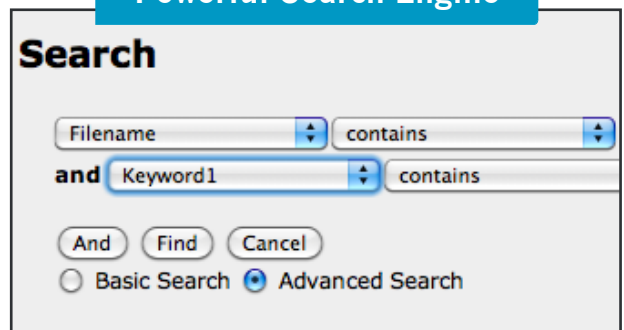

Cost effective :

Starting at \$699.

Upload Large Media Files

Powerful Search Engine

What our Customers Say...

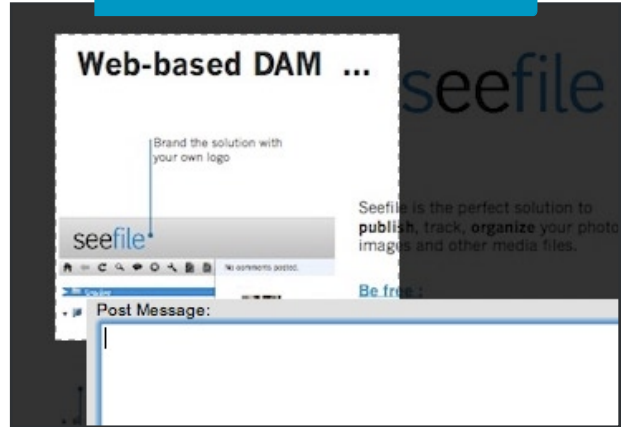

“The new SeeFile UI is efficient in its use of screen real estate and easy to understand. We’re even able to drag and drop files directly from Adobe Bridge to upload them to SeeFile which has made it quick to train photo assistants without wasting a lot of time. The developers of SeeFile appear to have listened to studio photographers and then created a complete solution that fits into a professional workflow.”

Daniel Life
Rat Race Studios

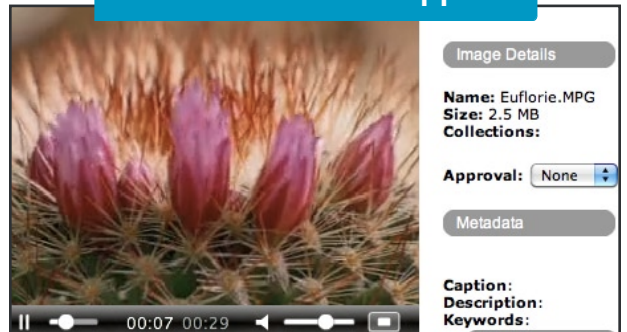

“My customers are able to review and download proofs if I allow them to, upload their own graphical files to the same folders, and communicate approvals with a click. It’s a phenomenal way to handle a range of client communication issues that in the past, have really limited small graphics firms like mine. I’ve been looking for something like this for years.”
