

SeeFile is the perfect solution to **publish**, track, **organize** your photos, images and other media files.

Be free :

Your **files** remain **on your computer**. There is no need for a host.

Appealing :

Thumbnails and previews are automatically created from SeeFile. In one click, you can see a preview and metadata.

Easy :

Universal access from a standard web browser Mac/Windows/Linux.

Online annotations :

From a low-res preview, a user can select an area and add comments that can be forwarded to your email.

You decide :

Who can upload or download files.

Cost effective :

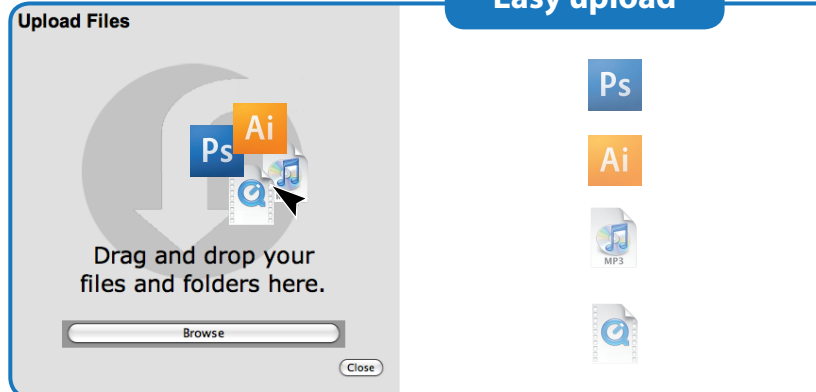

Starting at **\$499**.

Quick preview

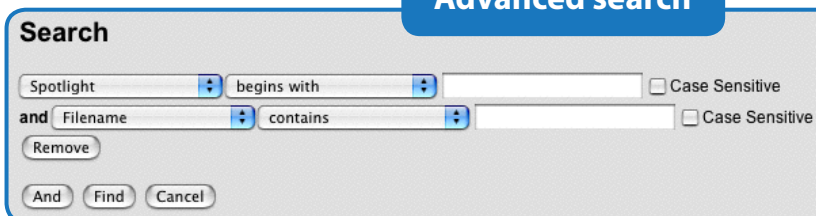

Preview documents in one click.

Easy upload

Drag and drop files to upload.

Advanced search

Take advantage of a powerful search engine.
